Qualifications

Education and Experience

Barbara Frederiksen received her basic education at American public schools and completed her High School education at Chemeketa Community College, at the age of sixteen.

She continued her education there, receiving an Associate of Applied Science degree in Computer Programming in 1974 at the age of eighteen.

Since then, she has continued her professional education with technical training from IBM, Amdahl, Hitachi Data Systems, Verhoef, SAS Institute, Merrill Consultants, Microsoft, and other education providers. This education has included advanced training in operating system internals, telecommunication system internals, database internals, diagnostics, system performance engineering, storage management, capacity planning, and data recovery.

Ms. Frederiksen has 40 years' experience in the computer industry and has held positions as, in chronological order: mainframe and midrange applications programmer; system analyst; software development consultant; programming instructor (developing courses in CICS, OS JCL, and VSAM internals); database administrator; systems programmer (problem diagnosis, maintenance and customization of mainframe operating system software and other software products); system performance specialist (for batch, on-line, and database systems); regional manager for a software consulting service provider; operating systems software developer (developing software to enhance the performance of mainframe computing systems); systems programmer (performing hardware planning and performance evaluation, system tuning, network tuning, disaster recovery planning, and managing data availability policies and procedures); systems programmer (responsible for problem resolution, software installation, and system maintenance for mainframe and midrange systems); UNIX system administrator; capacity planner (monitoring business metrics, sales forecasts, computer system performance, directing tuning efforts, and planning upgrades for MVS, AS/400, NCR 3600, Teradata, UNISYS, and UNIX systems); and forensic software analyst.

Ms. Frederiksen was team leader for the storage management/capacity planning team of a fortune 100 company for over three years, responsible for software, robotic tape libraries, management policies, and automated processes used to backup and recover global enterprise computer systems. In this capacity she also developed complex mathematical models to analyze and predict computer performance and capacity demands for national, regional, and global computer operations.

Since 1996 Ms. Frederiksen has worked in the field of computer forensics as a consultant to Johnson-Laird Inc., of Portland, Oregon.

Ms. Frederiksen has performed forensic software analysis for a variety of clients in over 100 civil and criminal matters. These matters include forensic software analysis in the context of copyright, patent, and trade secret disputes. She has analyzed computer software and source code in the context of over 40 Copyright/Trade Secret disputes. Her analysis experience with respect to these matters includes the evaluation and comparison of computer source code and object code to detect copying and derivative works, identification of third party and open source materials, analysis of architectural and other non-literal similarities, and analysis of computer source code to determine whether it incorporates or makes use of specific trade secrets. Copyright and Trade Secret clients include companies such as Caterpillar, Computer Associates, Compuware, FOREX Capital Markets, LexisNexis, iGPS, ProvoCraft, Symantec, and Webtrends.

Ms. Frederiksen has also analyzed computer software, source code, or prior art in the context of over 35 patent disputes with respect to both infringement and validity analysis. Her analysis experience with respect to these matters includes analysis to determine how software functions and whether it practices the specific invention claimed in the patent(s) in suit. She is also experienced in the analysis of computer software that may constitute prior art for litigated patents and analysis of the development history of computer software with respect to on-sale bar issues. Patent clients include companies such as Active Video Networks, Connectix Corporation, Encyclopaedia Britannica, Grantley Patent Holdings, Herman Miller, Hyundai, In-Three, Microsoft, MPI Technologies, Pitney Bowes, Siemens-Rolm, Teknowledge Corporation, and University of Pittsburgh.

Ms. Frederiksen has over 40 years personal experience as a software developer and consultant, and is familiar with licensing and contract practices common in the software industry as they apply to software consulting agreements, custom development, software licensing, and the sale of computer software. In the course of her career she has been responsible for negotiating consulting agreements and custom software development agreements as both a consultant and as a consumer of those services. She has been responsible for negotiating software license agreements for a fortune 100 company and also personally as both a licensee and licensor in such agreements. She has also developed software products and negotiated contracts for their subsequent sale.

Ms. Frederiksen has specialized knowledge of the analysis and remediation of failed software development efforts. She has been involved in software system audits performed by the State of Alaska, as well as forensic analysis relating to contractual disputes and litigation relating to failed software development efforts, licensing disputes, and the deployment and performance of software systems. As a forensic analyst, she has analyzed computer software, source code, and related computer-based evidence in the context of nine Software Licensing and Software Development disputes and three internal investigations relating to due-diligence for software acquisitions.

Ms. Frederiksen also has over five years experience with the oversight and evaluation of clean room procedures used for software development. This experience includes the development of clean room protocols and clean-room oversight for a major software development company, as well as actual experience

programming in a clean room environment. In the context of her work for Johnson-Laird, Inc., Ms. Frederiksen has reviewed and critiqued clean room protocols, prepared educational presentations on clean room procedures and protocols for JLI clients, and evaluated software developed in a clean room to determine whether it was free of inappropriate materials. She has provided testimony at arbitrations and hearings in the United States and Canada relating to clean room development procedures and protocols.

Ms. Frederiksen has experience in the design, implementation, and ongoing administration of databases and multi-dimensional data aggregation systems used to support business analysis, performance reporting, cross-system data sharing, and ad-hoc decision support queries. She has specific experience with the design, programming, tuning, and administration of the hardware, software, and underlying database management systems implemented to support batch and on-line query and update systems, data warehouses, and data marts. She has developed and written application software used to allow users to manipulate and analyze data using pre-defined reports and ad-hoc queries as well as software used in the context of high-volume real time transaction and messaging systems. This experience includes special training from professional organizations such as CMG, and over ten years experience in the evaluation, modeling, and tuning of hardware and software systems' performance and capacity.

She is experienced in the recovery, preservation, and analysis of computer-based evidence. Ms. Frederiksen has assisted with discovery and analysis of computer software and computer-based evidence relating to large scale product liability investigations such as the Vioxx, Propulsid, Rezulin, and Ford/Firestone matters. She has also provided forensic analysis in civil and criminal investigations relating to unauthorized computer access, sabotage, internet trespass, spyware deployment, evidence tampering, and identity theft; as well as analysis performed in the context of internal software audits, acquisitions, and internal investigations relating to employee conduct.

Ms. Frederiksen has provided evidence recovery and analysis in criminal cases for the FBI and for the defense in *State of California v. Saghari*. She was a police reserve specialist with the Hillsboro Police department 2002-2009, assisting in criminal investigations involving computer-based evidence.
